Doug/Arlene

I am primarily sending this note in response to requests you made earlier today. The material I provided earlier today is the sampling plan and no other documentation exists on the plan other than a map which was previously sent to you. The Village Mayor is the one that called for the 12/2 public meeting (availability session), and we have agreed to attend. Given he called for the meeting he is the lead on how public notification of results and the public meeting for 12/2 will take place. It is my understanding that for the Village Board meeting this past Tuesday, he used a combination of normal Village Board meeting advertisement and some notice in water bills. In that this is a small town news is easily spread. I expect we will have our factsheet completed by 12/2 and we will be sure that the 12/2 meeting is well advertised. In a conversation with staff here, I got a sense of confusion in understanding on our first round of sampling. To be sure the same points are not being confused I am sending the below. The biggest point I want to make is that Abbott Street is on public water, and it is not a private well result. The same is for the True Hardware Store, it is served public water.

I am sure we will be in touch. Have a good weekend. Lloyd

Individual Wells-not on public supply

High School Water tap—non detect less than 2.24 ng/l

██████████ Route 67 —non-detect less than 2.24 ng/L

██████████ Route 22—non-detect less than 2.24 ng/L

Ex. 6

██████████ Route 22—detect 58.4 ng/L

██████████ Route 22 —non-detect less than 2.24 ng/L

██████████ Route 22 —detect 16.0 ng/L

██████████ Bovie Hill Road —detect 194 ng/L

██████████ Mickel Hill Road—non-detect less than 2.24 ng/L

Public Supply Wells

██████████ Abbott Street—Public water supply is source—bathroom sink 618 ng/L

Water treatment plant clearwell-662 ng/L

Water treatment plant supply well 3-151ng/L

Water treatment Plant village well 7-620 ng/L

True Value Hardware-21953 Route 22 -612 ng/L

Yes, it is a very simple plan.

When you look at the proposed locations in combination with the past sampling event you will see that the proposed effort will give us locations that circle the Area with known groundwater contamination. We are wondering if that waterline that goes across the river has been a conduit for contamination migration. We are hoping that several of the locations we have proposed are non-detect, if they are then we will have a pretty good idea of the bounds of the contaminant migration. We also think we have a priority based on potential population exposed. It is why we sampled the school in the first round.

Arlene,

Here are the proposed private wells with some small non-community systems included. We have the resources to sample 10 wells. There are GPS coordinates for two locations that we contemplated sampling last time. Addresses are provided for all and when they visit next week to sample they will get GPS coordinates. You can see our "plan" includes the identification of a few other locations in case we can not collect a sample at any of the first ten locations listed. It is possible that the well owners will refuse, the well is not used and or no one is home when we try to sample.

Lloyd

Targeted:

Ex. 6

- **Well** at northern end of Davis Street. Belongs to [REDACTED] according to our data.
- **Private residence** at [REDACTED] Ball Street ext. County Route 101. This will be to determine whether contamination is flowing to the east (already have one well to southeast that was non-detect in first round)
- **[REDACTED] NY-22** behind the [REDACTED]. They may not have a well as we understand this building is connected to Village water via a line going under the river.
- **[REDACTED] NY-22**
- **Commercial Building** at [REDACTED] NY-22 north of the [REDACTED]
- **Private Residence** at address unknown, NY-22 between the commercial building and [REDACTED]
- **[REDACTED] NY-22**
- **Hoosick Falls School District Bus Garage** at NY-22 north of NAPA same side of road. (GPS, 42.890238, -73.361019)
- **[REDACTED] NY-22**
- **[REDACTED] NY-22** North of the School District. (GPS, [REDACTED])

Alternative:

Others for consideration if access to one or more of the above is not possible are:

Private Residence on NY-22 North of Village address is [REDACTED] NY-22

Private residence at [REDACTED] NY-22

Bowling Alley at [REDACTED] NY-22

Village Clear well
